23. (New) The system of claim 12, further comprising means for querying the sports server for specific data from all data in said sports database using an output device connected to said sports server using the public mobile communications network.

C1

24. (New) A mobile terminal for transmitting sports data to a sports database of a sports server connected to a communication network, said mobile terminal comprising:

means for initiating a communication connection with the sports server using a public mobile communications network;

means for setting the mobile terminal in a sports data input mode;

means for receiving a selection of a selected sport to which the sports data pertains;

and

means for directly transmitting data input from the mobile terminal to the sports server using the public mobile communications network as the sports data is input by the user.

25. (New) The mobile terminal of claim 24, wherein said means for receiving a selection of a selected sport comprises means for prompting the user to select the selected sport for which data is to be entered.

26. (New) The mobile terminal of claim 25, wherein said means for prompting comprises a display for displaying a list of sports for which data may be entered.

27. (New) The mobile terminal of claim 25, further comprising means for prompting the user for sport specific data to be input for the selected sport.

28. (New) The mobile terminal of claim 27, wherein said means for prompting the user for sport specific data comprises a display for displaying fields of sport specific data to be input for the selected sport.

C
29. (New) The mobile terminal of claim 24, further comprising means for prompting the user for sport specific data to be input for the selected sport.

30. (New) The mobile terminal of claim 24, further comprising means for querying the data server using the public mobile communications network and displaying data received from the data server.

31. (New) The mobile terminal of claim 24, wherein said mobile terminal comprises one of a personal digital assistant, a mobile phone, a pager, a two-way radio, a smart-phone, and sports database specific input devices.
